Please Note: This game requires an HTC Vive Virtual Reality headset to play.

Grab your laser guns and strap on your jet pack. Asteroid Blas 5d3b920ae0

Title: Asteroid Blaster VR
Genre: Action, Casual, Indie
Developer:
Senomix Research
Publisher:
Senomix Research
Release Date: 28 Sep, 2016

Minimum:

Requires a 64-bit processor and operating system

OS: Windows 7

Processor: Intel i5-4590

M

English

asteroid blaster vr

Fun blaster. Reminds me a lot of the original where flying around took some skills that I sorely lack. Not for anyone that suffers vertigo. You are falling through space! I think it should default to wave mode as the arcade (endless) mode gets too hectic too quickly. In endless if you could at least clear the map before more crap came at you that would be nice. There are sooo many

shiny things to collect but all seem just a bit too far away I am always out of thrust. I think you need to coast more and/or the shiny objects should be slightly attracted towards you.. Attempting to get into the "Options" menu does not work. Is there a fix? This game has been out for 2 years now, and it seems that you've had plenty of time to work out any bugs. I wouldn't recommend this game in its' current form.. Interesting thought occurred to me. VR is blazing a new trail in gaming, but some of the best games or experiences out there are re-makes of classics from the very first video games ever; and this works. For example, earlier on I was playing Gunjack which is basically Space Invaders on steroids, and it is a blast! This is basically Asteroids on steroids, very simple approach to it too. You are basically like Ironman flying around and blasting them. It works, is addicting and simple. There is no storyline, which can also be good. In my mind I can create a mission such as "I am clearing space lanes for galactic travelers, which is a great way to earn extra cash, being a top notch pilot.".. Odd that such a basic VR game is one of the most immersive, fun and beautiful VR games to date.. Hard, Classic, Asteroids. Takes you back to time immemorial. The 70's! <https://www.youtube.com/watch?v=5nvth-kGtQ8>. This game is very much a vr version of asteroids from years ago. Asteroids are gigantic and very realistic looking. You gonna have fun busting these rocks up.. Has a nice addicting quality. Should be priced a little lower IMHO as its really pretty simplistic. Fun regardless.. This games work fine oculus rift very fun game to play and very addicting. Remember the game Asteroids? That game sucked pockets of quarters from me. This spiritual successor puts you in a 360 environment floating in space. You fly by jet pack and have the famous hyperspace. It sounds really simple right? Throw in gigantic asteroids sometimes flying at breakneck speed and you are in for a frantic experience. Beware those pesky aliens.
